

David Palacio is a bilingual Artificial Intelligence Engineer with a strong background in statistics, machine learning, and deep learning. He has expertise in supervised learning, neural networks, NLP, and large language models (LLMs). David has developed innovative AI solutions across various industries, including financial estimations, healthcare, geological risk prediction, and generative AI for treatment plans. He has extensive experience in MLOps, handling end-to-end pipelines, deployment, monitoring, and CI/CD implementations. Passionate about leveraging cutting-edge technology, he excels at driving success and improving team performance.
